

SMART HOME DISCUSSION

5W1h (#1)

WHAT is smart home / intelligent building system?

Automation, Integration, Connectivity.

- ❖ Automation
 - Automatic activation based on: time/schedule, occupancy (human), sensor value (environment)
 - Manual activation: override automatic function
- ❖ Integration operation of lighting, blinds / smart glass, aircon, audio & video, power source, (security, safety) to create **scenes**.
- ❖ Connectivity: smart gadget (hp, tab), smart device, IOT, geo location
- ❖ Smart home Environment (related with protocols)

WHY using smart home / intelligent building system

- ❖ Better life, Comfort living, Saving energy, or Pride?
- ❖ Human centric artificial environment (healthy)
 - Lighting ambience: light scenes, HCL/TW, RGBW mood booster
 - Ventilation fresh air CO2 sensor, air conditioning comfort – saving energy regulation

SMART HOME DISCUSSION

5W1h (#2)

WHO

- ❖ User: Hi-tech savvy **or** comfort-oriented traditional person
- ❖ Involvement: Consultant (Architect, Design Interior, Lighting Cons, Mech. Electrical Cons, SI)
- ❖ Applicator: Multi brand System Integrator Vs Single brand System Integrator

WHERE

- Building / project character (life span, etc) define where and to buy what
- Remote area vs local area

WHEN

- To decide go / not go at different project stage: cost impact
- „The Death of Expertise“, flying hours

HOW..
